HOUSTON OFFICE UPDATE

We continue to make headway on our latest Houston addition. These racks won't be empty for long! Next up, we'll be renovating our existing office space to include more space for our expanding team.

"Excellence is doing ordinary things extraordinarily well." –John W. Gardner

At Dover, we work every day to achieve excellence in what we do. But we know that in order to claim high standards, you need to be willing to put in the work. That's why Dover inspects all our material to the highest QA standards in the industry. With the addition of our **new boroscopes**, we're taking things a step further by inspecting IDs with the clearest resolution possible. This allows us to provide the best possible products to our customers.

Stainless steel isn't just brutally strong—it can be elegant as well.

Did you know?...

Dover Tubular Alloys maintains one of the largest inventories of stainless steel tubing available within the United States.

We specialize in both seamless and welded varieties of instrumentation, heat exchanger, condenser, boiler, general

service, and mechanical tubing (hollow bar) in a variety of grades. But Stainless steel isn't just brutally strong—it can be elegant as well. Whether you're looking for strength, beauty, or both, our stainless steel can deliver.

We proudly salute Chris Buzec, this month's Employee Spotlight!

How long have you worked at Dover? Since March '94

What do you do? Currently I am the NJ Sales Manager. Previously, I've worked in sales and all-around administrative roles.

What is your favorite part about working at Dover? As the years pass, you become close to the people you work alongside. It's like extended family. I think you need a happy place to work and I have that.

What is one accomplishment you are most proud of? I love working for the Rattner family (grandfather, father and son) and doing it up to their standards. They have taught me a lot. It's good to be accepted and appreciated--and hard work does pay off in more than a monetary way. They are a great family and I am happy to have worked with them.

Tell us something surprising about you that your co-workers may not know? I used to be able to whistle through my nose, until I ran into a chin-up bar and broke my nose and nearly bit my tongue in half.

What is something on your bucket list? To travel to Africa for a safari and ride an elephant.
