

THE PIPELINE

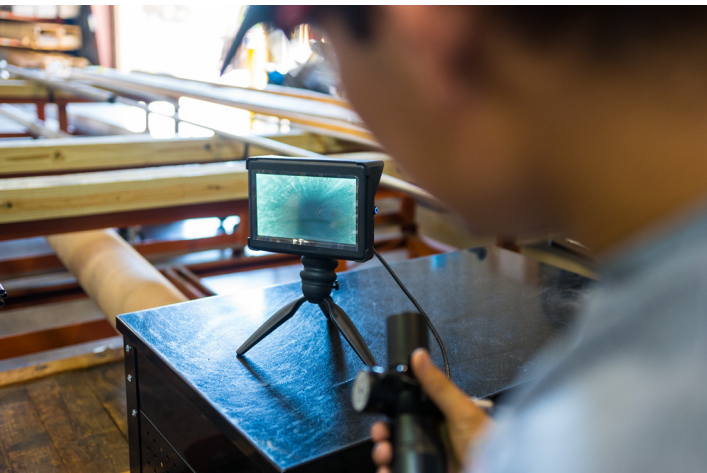

November 2022
Issue 7

Quality is Everything.

When you purchase from Dover, you get more than just quality material and fast service; you get peace of mind as well. Every product line we stock is subject to quality control over-and-above industry standards.

After consecutive years of tight supply, transit bottlenecks, and uncertainty, you might assume quality would suffer for the sake of availability; but we've doubled down on our promise to provide only the best to our customers.

We've invested heavily in both our people and equipment to make sure whatever is put on our shelves is worthy of your customer's needs. We're in constant contact with vendors, making sure steps aren't skipped just to meet deadlines. Finally, we believe in responsiveness to a customer's needs. Our fingers are constantly on the pulse of the market, to make sure we exceed the expectations of the industry at every turn.

We proudly salute Dave Green, this month's Employee Spotlight!

What is one accomplishment you are most proud of?

The accomplishment I feel I am most proud of here at DTA is being the first person to make the transition from working in the warehouse to working in the sales office. It was a major change from physical to mental and I know I'm still learning everyday.
